Environmental protection configuration of green space

环保配置 绿色空间

LED绿色照明,不含汞、铅等对环境污染很大的重金属,发光时会产生紫外线,因此LED照明不会象传统的灯具那样有很多蚊虫围绕在光源旁使环境变得更加干净卫生整洁;金属壳恒流驱动的创新设计使产品电能转换成光效率非常高。

LED green lighting, which does not contain mercury, lead and other heavy metals polluting the environment, will produce ultraviolet light when it emits light, so LED lighting will not be surrounded by many mosquitoes like traditional lamps to make the environment cleaner and tidier. The innovative design of metal shell constant current drive makes the product energy conversion to light efficiency very high.
